SUMMARY

I am a results-driven OIC professional with over 3.5 years of experience in developing and architecting integration solutions. With expertise in Oracle Cloud technologies and a strong foundation in SQL and PL/SQL, I aim to contribute to progressive organizations by enhancing operational efficiency through seamless integration. My collaborative spirit and technical expertise drive project success

EXPERIENCE

Analyst (Oracle Fusion and OIC Developer)

Deloitte USI

📅 06/2024 - Till Now   📍 GURUGRAM, INDIA

A leading consulting firm specializing in providing services in audit, tax, consulting, and financial advisory

- Developed and customized BIP reports for modules such as CM, GL, AP, AR, and Product Hub, enhancing reporting capabilities
- Streamlined the invoicing process by integrating C2A invoices
- Implemented outbound and inbound integrations related to I&S, MDM, SCM and FIN modules to ensure seamless data transfer and communication between systems.
- Collaborated with cross-functional teams to gather requirements and design tailored solutions
- Provided technical support and troubleshooting for integration issues, minimizing downtime and performance improvement.
- Participated in regular project meetings to update stakeholders on progress
- Gained expertise in Oracle Cloud offerings (SaaS and PaaS) and Web Services

Associate (OIC Developer)

Cognizant Technology Solutions Pvt. Ltd

📅 12/2021 - 06/2024   📍 NOIDA, INDIA

A multinational technology company that provides IT services and solutions

- Designed and implemented end-to-end integration solutions using Oracle Integration Cloud (OIC)
- Collaborated with business stakeholders to gather integration requirements
- Developed many outbound and inbound integrations for HCM area, inbound integrations which take the files from SFTP location, read data, write data, perform validation (with stored procedures), transformation on data and load it to HCM application, sends the error reports for errored records which failed in HCM load via notification service.
- Provided a solution for timeout issues, saving both costs and time
- Developed an integration to extract the data related to the audit's last update, manual submission detail, schedule detail etc.
- Worked closely with QA teams to perform thorough testing and validation
- Developed integration to automate maintenance activity (integration's Activation, Deactivation, and start/stop schedule during maintenance time window). Earlier this activity was manual and taking 5-6 hour, after this innovation it takes 70-80 minutes.

EDUCATION

B.Tech

Amity University

📅 07/2017 - 07/2021   📍 JAIPUR, INDIA

STRENGTHS

🚩 **Integration Solutions Development**

Proficient in designing and implementing integration solutions, and experienced in collaborating with cross-functional teams
